

Arithmetic Operators (+, -, *, /, %, **)

1. Add Two Numbers

Write a program that stores two numbers in variables and displays their sum.

2. Subtract Two Numbers

Write a program that finds the difference between two numbers.

3. Multiply Two Numbers

Write a program that multiplies two numbers and displays the result.

4. Divide Two Numbers

Write a program that divides one number by another.

5. Find Remainder

Write a program that finds the remainder when 25 is divided by 4.

6. Calculate Square

Write a program that finds the square of a number using the exponent operator.

7. Calculate Cube

Write a program that finds the cube of a number.

8. Average of Three Numbers

Write a program that calculates the average of three numbers.

9. Area of Rectangle

Write a program that calculates the area of a rectangle using length and width variables.

10. Temperature Conversion

Write a program that converts Celsius temperature into Fahrenheit.

Assignment Operators (=, +=, -=, *=, /=, %=)

11. Increase Salary

Create a variable `salary = 50000` and increase it by 5000 using `+=`.

12. Decrease Bank Balance

Create a variable `balance = 10000` and decrease it by 2000 using `-=`.

13. Double a Number

Create a variable `num = 15` and double it using `*=`.

14. Half a Number

Create a variable `num = 40` and divide it by 2 using `/=`.

15. Find Remaining Value

Create a variable `num = 17` and apply `%=` with 5.

16. Update Product Price

Create a variable `price = 2000` and increase it by 10%.

17. Add Bonus Marks

Create a variable `marks = 75` and add 5 bonus marks using `+=`.

18. Reduce Stock Quantity

Create a variable `stock = 100` and reduce it by 15 using `-=`.

Comparison Operators (`==`, `===`, `!=`, `!==`, `>`, `<`, `>=`, `<=`)

19. Check Equal Numbers

Write a program that checks whether two numbers are equal using `==`.

20. Check Strict Equality

Write a program that compares `"10"` and `10` using `===`.

21. Check Not Equal

Write a program that checks whether two values are different using `!=`.

22. Find Greater Number

Write a program that checks which number is greater between 15 and 20.

23. Check Passing Marks

Write a program that checks whether marks are greater than or equal to 50.

24. Check Voting Eligibility

Write a program that checks whether a person's age is 18 or above.

25. Compare Product Prices

Write a program that checks whether Product A is cheaper than Product B.

26. Compare Heights

Write a program that checks whether one student's height is greater than another student's height.

Logical Operators (&&, ||, !)

27. Eligible for Driving License

Write a program that checks whether a person is at least 18 years old **and** has a valid ID card.

28. Login System

Write a program that checks whether the username is correct **and** the password is correct.

29. Scholarship Eligibility

Write a program that checks whether a student has marks above 80 **or** belongs to a sports category.

30. Check Weekend

Write a program that checks whether the day is Saturday **or** Sunday.
