

JavaScript Practice Programs (Variables, Operators & Conditions)

Variables & Arithmetic Operators

1. Store your age in a variable and display it.
2. Store two numbers and display their sum.
3. Store two numbers and display their difference.
4. Store two numbers and display their product.
5. Store two numbers and display their quotient.
6. Find the remainder when one number is divided by another.
7. Calculate the square of a number using the exponent operator.
8. Calculate the cube of a number.
9. Find the average of three numbers.
10. Calculate the area of a rectangle.
11. Calculate the perimeter of a rectangle.
12. Convert Celsius temperature into Fahrenheit.
13. Convert minutes into hours.
14. Calculate the total marks of five subjects.
15. Calculate the percentage of marks obtained.

Assignment Operators

16. Create a variable salary and increase it by 5000 using +=.
17. Create a variable balance and decrease it by 2000 using -=.
18. Double a number using *=.
19. Divide a number by 2 using /=.
20. Find the remainder using %=.
21. Increase product price by 10% using assignment operators.
22. Add bonus marks to a student's result.
23. Reduce stock quantity using -=.
24. Increase employee experience years by 1 using +=.
25. Update a bank account balance after depositing money.

Comparison Operators

26. Check whether two numbers are equal using ==.
27. Check whether two values are strictly equal using ===.
28. Check whether two numbers are not equal using !=.
29. Compare two numbers and find which one is greater.
30. Compare two numbers and find which one is smaller.
31. Check whether a student's marks are greater than 50.
32. Check whether age is greater than or equal to 18.
33. Check whether temperature is less than 0.
34. Compare prices of two products.
35. Compare heights of two students.

Logical Operators

- 36. Check whether a person is eligible for a driving license (age ≥ 18 AND has CNIC).
- 37. Check whether login credentials are correct (username AND password).
- 38. Check whether a student is eligible for a scholarship (marks > 80 OR sports quota).
- 39. Check whether a day is Saturday OR Sunday.
- 40. Check whether a person is NOT banned from a website.

Conditional Statements (if)

- 41. Write a program that displays "Passed" if marks are greater than or equal to 50.
- 42. Write a program that displays "Adult" if age is 18 or above.
- 43. Write a program that displays "Even Number" if a number is divisible by 2.

Conditional Statements (if-else)

- 44. Check whether a number is even or odd.
- 45. Check whether a student has passed or failed.
- 46. Check whether a number is positive or negative.
- 47. Check whether a person is eligible to vote or not.
- 48. Check whether a user entered the correct password or not.

Conditional Statements (if else-if)

- 49. Create a grading system:
 - 90+ = A Grade
 - 80+ = B Grade
 - 70+ = C Grade
 - 60+ = D Grade
 - Below 60 = Fail
- 50. Create a traffic light system:
 - Red = Stop
 - Yellow = Ready
 - Green = Go
